## Namida Games - Breaking Boundaries

Namida Games is an Oulu, Finland-based mobile gaming startup founded in October, 2014. Our team consists of different backgrounds and ideologies - regardless, we all share the same passion for culture and games combined. It is our pride and honor to be one of the first pioneers in the industry to bring both educational, and entertainment value to portable handheld devices. We believe that the mobile gaming industry will undergo big changes in the near future, and we aim to be in its very core.
